By installing, copying, or otherwise using the Software (all within the limitations set forth in this Agreement), you agree to be bound by the terms of this License Agreement. If you do not agree to the terms of this License Agreement, DO NOT install or use the Software.

1. SOFTWARE LICENSE GRANT

1.1 **License.** Subject to the terms of this End User License Agreement ("License"), Woody Technologies, a company registered in France under company number 794 216 606, located 157 Boulevard McDonald, 75019 Paris, France (the "Company"), grants to the end user set forth above ("End User" and, together with the Company, the "Parties"), a limited, nonexclusive, license, without the right to transfer or sublicense, to use, for internal business purposes only, the number of copies set forth above of the Software and Documentation at the offices of End User at the location set forth above. "Software" shall mean the Company's proprietary software licensed hereunder and described above, in object code form, including all accompanying documentation ("Documentation"), but excluding any open source software.

Notwithstanding the foregoing, the licenses granted herein exclude any license for patents reasonably necessary to practice or otherwise related to video compression technologies as standardized by the ISO/IEC Motion Picture Experts Group (MPEG), the ITU Telecommunication Standardization Sector (ITU-T), and/or the Society of Motion Picture and Television Engineers (SMPTE); audio compression as standardized by ISO/IEC MPEG; or RF modulation as standardized by DVB/ETSI.

The duration of this License shall be granted for the legal duration of right protection as provided for by Article L. 123-1 of the French Intellectual Property Code (FIPC) unless this License terminated as set forth below, in which case End User shall cease using the Software and immediately return all copies of the Software to the Company or, if requested by the Company, destroy all copies of the Software.

1.2 No Other Licenses; Restrictions.

(a) Other than as expressly set forth in this License, (i) the Company grants no licenses, expressly or by implication, and (ii) Company's entering into this License will not be deemed to license or assign any intellectual property rights of the Company to End User or any third party. Without limiting the foregoing sentence, End User agrees to use each copy of the Software on the hardware on which it has been installed by the Company. End User agrees not to (1) reverse engineer or otherwise attempt to derive the source code of any software provided under this License, in accordance with those restrictions set forth in Article L. 122-6-1-IV of the FIPC, if such are applicable, or (2) publish any results of any benchmark tests run on the Software, the Third-Party Products or any components thereof. End User will not use any Software other than at the installed locations without first informing the Company in writing, and such software will only be used at Company authorized locations.

(b) If End User wishes to obtain that information required to allow the utilization of the Software by a computer program created independently from the Software, as provided for in Article L.122-6-1-IV of the FIPC, End User must inform Company of such desire in advance and submit a written request detailing the required information and the planned use of the Software. If Company decides that End User is authorized to obtain this information pursuant to Article L.122-6-1-IV of the FIPC, Company may either: (i) supply the interoperability information, or (ii) authorize End User to reverse engineer the Software, in accordance with those restrictions provided for in Article L.122-6-1-IV of the FIPC, and solely insofar as necessary to obtain the interoperability information. Should Company choose option (i) described above, End User must supply all necessary information and assistance, upon reasonable request by Company, so that Company may comply with its obligations set forth in (i) and Company shall invoice End User for the requested information regarding the existing interoperability based upon hourly and daily rates.

(c) If any component of the Software or any of its components is marked "Prerelease" or "Beta", the component of the Software constitutes prerelease code and may be changed substantially before commercial release. End User may not use such component in a live operating environment where it may be relied upon to perform in the same manner as a commercially released product or with data that has not been sufficiently backed up.

1.3 **Operations.** It is the responsibility of the End User to perform all necessary backups of the Software operational databases needed to ensure proper recovery of the System in case of failures. "System" shall mean, collectively, the Software, any Third-Party Products and any additional products provided by Company.

1.4 **Third Party Products.** Subject to the terms of this License, the Company agrees to sublicense any software that constitutes or is contained in Third Party Products, in object code form only, to End User during the term of this License, only as part of the System for the purposes described in Section 1.1 of this License. Third Party Products include software obtained from third-party manufacturers or distributors and provided by the Company hereunder including open source software. This sublicense is conditioned on End User's continued compliance with the terms and conditions of the end-user licenses (a) contained on or in the media on which such software is provided or (b) otherwise provided by the Company to End User.

1.5 **Open-Source Notices.** Certain components of the Software may be subject to open-source software licenses ("Open-Source Components"), which means any software license approved as open-source licenses by the Open Source Initiative or any substantially similar licenses, including without limitation any license that, as a condition of distribution of the software licensed under such license, requires that the distributor make the software available in source code format. The Software documentation includes copies of the licenses applicable to the Open-Source Components.

To the extent there is conflict between the license terms covering the Open-Source Components and this EULA, the terms of such licenses will apply in lieu of the terms of this EULA. To the extent the terms of the licenses applicable to Open-Source Components prohibit any of the restrictions in this Agreement with respect to such Open-Source Component, such restrictions will not apply to such Open-Source Component. To the extent the terms of the licenses applicable to Open-Source Components require Licensor to make an offer to provide source code in connection with the Product, such offer is hereby made, and you may exercise it by contacting support@woody-technologies.com.
